

Kauri Park – 3 Step Plastic Recycling Methodology

Polyethylene terephthalate

- 0.5L, 1L and 1.5L Trays

Low Density Polyethylene

- Shrink Wrap
- Pallet Wrap
- 1 Tonne Bulk Bags

Polypropylene

- Pots, Broken Propagation Trays, Bread Trays

Polystyrene

- Trays for 0.5L & 1L pots, 50 Cell & Fertil Trays, 338 & 288 cell seedling trays

- 1** - All pots and trays are collected from our planting projects by our truck fleet and returned back to the Kauri Park warehouse
- 2** - Plastic is sorted into the four recycling types and each item is clearly depicted in the recycling bays. Each plastic type is then chipped and bagged through our plastic recycling operation.
- 3** - The bulk bags are then taken to plastic recycling plants to be repurposed into a long-term item such as agricultural pipes or Future Post. All plastic is recycled and taken from a single-purpose plastic to improve NZ's Primary Industries.

Kauri Park – 100% Closed Loop – Plastic Recycling Process
